

LUXURY OUTDOOR SWIMMING POOL

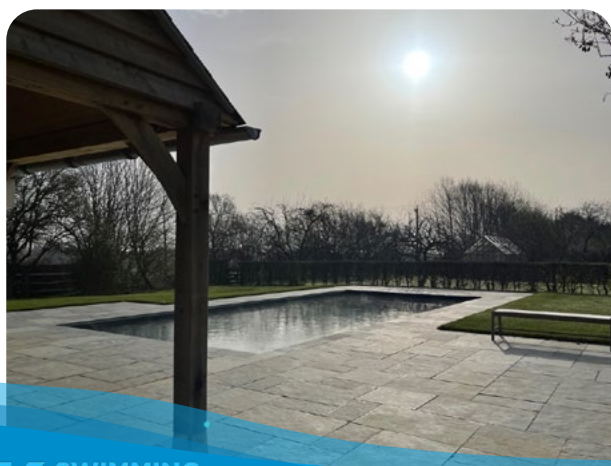

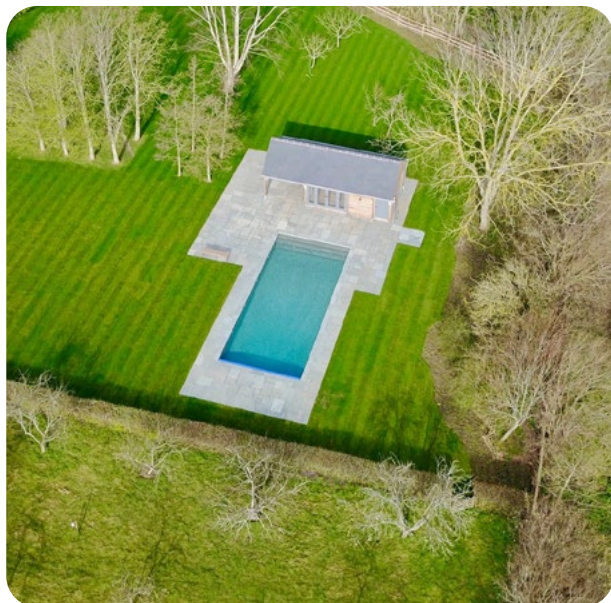

& Pool House – Barcombe, Lewis, East Sussex

THE PROJECT

Our team was commissioned to construct a new reinforced concrete swimming pool and a contemporary pool house in Barcombe, UK. The project aimed to create a luxurious outdoor space featuring an 11 metre by 5-metre pool with a depth range of 1 to 2.1 metres. The pool boasted fully green glass mosaics with contrasting bands and borders, multi-colour changing lights controlled remotely, and a comprehensive filtration system with saline and UV components. Additionally, we built a pool house that housed a changing room, toilet cloakroom and filter equipment area. The project also included 200 meters of limestone paving and a fully integrated automatic safety cover.

The construction process involved careful integration of the pool house and swimming pool designs, meticulous material selection and coordination with specialised suppliers for the safety cover installation. The result was a harmonious blend of aesthetics and functionality, enhancing this Barcombe home. The project's success was attributed to effective planning, close collaboration with the owners and attention to detail, resulting in a stunning outdoor space that exceeded the client's expectations.

Swimming Pool Refurbishment / Wellens Spaces
