

CONCRETE POOL & SPA COMBO

with Outdoor Kitchen

THE PROJECT

A family in Petts Wood wanted to create a luxurious leisure space. Their vision included a new concrete pool and spa combination with a fast flow water-injected spa area that could comfortably seat eight people. They also wanted to incorporate light green mosaic tiles for a refreshing and visually appealing touch. Additionally, the clients sought to integrate a new outdoor kitchen area with a slate roof, where they could entertain guests and enjoy outdoor cooking and dining experiences.

The skilled team at UK Swimming Pools worked diligently with the family to bring the design to life, ensuring the highest quality of workmanship and timely completion. The elegantly designed pool and spa combination, enhanced by the captivating mosaic tiles, provided a peaceful escape from everyday life. The addition of the outdoor kitchen enhanced the space's functionality, creating an inviting atmosphere for hosting and family and friends to enjoy.
