

LUXURY SWIMMING POOL

with Contemporary Pool House

THE PROJECT

This UK Spa & Pool Award-Winning project involved the construction of an elegant 11m x 5m concrete swimming pool and adjoining pool house for a discerning client in West Sussex. The goal was to create a modern and striking outdoor living space with superior amenities.

The pool itself features high-end black and silver mosaic tilework arranged in bold contrasting bands. Integrated remote-controlled variable lighting provides ambient multi-coloured effects. An advanced filtration system with saline and UV treatment ensures pristine water quality. The surrounding pool area comprises 200m² of limestone paving, along with an automatic safety cover, cascading fountains, a water slide and spa-like air jets. The contemporary pool house encompassing changing facilities and equipment areas.

The entire project was carried out in-house, highlighting our comprehensive expertise and eliminating the need for external contractors. This inclusive approach enabled the installation of a fully integrated automatic child proof safety cover, elegant water fountains and the incorporation of a children's water slide. By assuming full responsibility

for the project, we ensured a seamless and coordinated execution, allowing our clients to avoid the complexities of managing multiple contractors.

The construction process involved careful integration of the pool house and swimming pool design. The result was a harmonious blend of aesthetics and functionality. The project's success was attributed to effective planning, attention to detail and close collaboration with the owners, resulting in a stunning outdoor space for a young family that exceeded the client's expectation.
